When a biological spill occurs...

1. Survey the scene
   - Injured person? Apply first aid or call 911
   - Sharps?
   - How much spilled material?

2. Gather supplies
   - Locate Biohazard Spill Kit
   - Mix disinfectant
   - Don PPE

3. Remove sharps
   - Never use hands
   - Place in sharps container

4. Cleanup spilled material
   - Unfold towel and place over material
   - Saturate with disinfectant and wait contact time
   - Wipe up spill
   - Repeat until clean

5. Discard & decontaminate
   - Disposable materials--biohazard bag
   - Sharps--sharps container
   - Non-disposable items--spray with disinfectant

6. Remove PPE & wash hands
   - Remove PPE
   - Decontaminate and dispose
   - Wash hands
