April 30, 2013

Iowa State University holds a broad scope radioactive materials license from the Iowa Department of Public Health, expiring on October 1, 2017. The license authorizes possession of byproduct material for research and development as defined in Iowa Administrative Code 641-38.2(136C), in laboratory research and student teaching.

The Broadscope application including SOPs and license is available for viewing at the Environmental Health and Safety Services Building during normal business hours.

Copies of the license are made available to licensees transferring radioactive material to Iowa State University.

For further information please contact the Radiation Safety Officer (515) 294-5359.
