<tbody>
<tr>
<td>Size / Horse power</td>
<td>4” – 6” Hose Connection / 1200 CFM / 2 HP</td>
</tr>
<tr>
<td>Power source</td>
<td>115 volt through plugged power cord</td>
</tr>
<tr>
<td>Uses</td>
<td>Removal of wood dust from equipment</td>
</tr>
</tbody>
</table>

Safety Precautions

**Hazards**
- Flying debris (potential eye and face damage)
- Electrical shock
- Entanglement of hair, jewelry, or clothing

**Training**
- Shop Safety Fundamentals
- Site Specific Training

**Protective Equipment**
- Safety Glasses
- Tie back long hair
- Avoid loose fitting clothing

Operation

**Startup**
1. Put on PPE listed above
2. Ensure all guards are present and function properly
3. Make necessary adjustments for safe operation
4. Inspect machine for damage or obstructions to operation
5. Turn on by pressing the Start button mounted next to the motor
6. Begin work
7. Keep hands and personal objects clear of suction surfaces

**Shutdown**
1. Turn off by pressing the Stop button mounted next to the motor
2. Allow dust collector to come to a full stop

**Filter Bag Installation**
1. Place the hanger (A) on the hanger bracket (B)
2. Slide the filter bag loop (C) over the hanger hook
3. Feed the retainer strap (D) through the loops on the filter bag (E) and fasten to the collector housing (F)
Collector Bag Installation

1. Insert the ring of the collector bag (A) at an angle into the housing (B) through the opening at the bottom
2. Pull down on the bag to make sure it “seats” in the housing
3. Position the plastic window in front so that you can view when the collector bag is full

Maintenance
