

Carcinogens, Reproductive Toxins and Teratogens

The materials on this list pose a significant risk of exposure or damage to the human body and require special procedures be developed for their safe use. Refer to page four of the Laboratory Safety Manual for more information. Materials involving industrial processes or manufacturing conditions which are not generally present at Iowa State University may have been omitted from this list. To ensure the current status of a chemical, check with the coordinating agency at the locations footnoted, a current safety data sheet (SDS) or call Environmental Health and Safety (EH&S) at (515) 294-5359.

OSHA – Occupational Safety and Health Administration¹
X – regulated carcinogen

IARC – International Agency for Research on Cancer²
1 – known human carcinogen
2A – probable human carcinogen
2B – possible human carcinogen

NTP – National Toxicology Program³
K – known carcinogen
A – reasonably anticipated to be a carcinogen

Repro Toxin – Reproductive Toxin
X – material considered by one or more footnoted references to be harmful to adult reproductive systems

Tera – Teratogen
X – material considered by one or more footnoted references to cause birth defects in off-spring
