

First Aid Kit Guidelines

First aid kits, appropriate for the department size and hazards present, should be maintained in convenient and accessible locations. First aid kits should meet ANSI Standard Z308.1 for minimum content requirements. See Table 1 below for minimum contents.

First Aid Kits available at Iowa State University [Central Stores](#) are ANSI-compliant. Individual items should be replenished as they become depleted. Refills are also available from Central Stores.

Iowa State University employees responsible for providing first-aid may need additional supplies to ensure protection from bloodborne pathogens or specific workplace hazards. Examples include CPR microshields, waste bags with biohazard labels, and specialty items such as calcium gluconate or polyethylene glycol 300 or 400 (PEG-300 or PEG-400).
